ABOUT US

TAA Textiles, a brand in the Home Textile sector with a lot of expertise began in 2004, with the purpose of giving the greatest services, quality, and satisfaction to our clients in all aspects.

Since
2004

In main, our own production line includes knitted bedding kitchen linen and bath linen. We continue to strive to produce the highest quality merchandise that is worth the price paid and provides the required level of usefulness and contentment to the user.

Our diligent founders have always aimed to improve the quality and productivity of their work. This has contributed to the production capacity reaching an astounding annual output of 60 million meters.

www.taatex.com

Knitting is a fabric-making technique that uses a continuous thread or combination of yarns to create a sequence of interlocking loops. Each loop or knot links to the one before it, and when enough loops are produced, the result is a flat sheet of material known as textile fabric.

Dyeing is the process of applying colors to textile materials such as yarns, fibers, and textiles. Our team oversees this procedure in order to ensure that the quality of our fitted sheets and bed linens is not compromised.

Finishing: is an operation that enhances the look of cloth after it has been knitted. This adds lustre to the cloth and keeps it from shrinking when washed.

Quality: TAA Textiles prioritizes quality; our highly qualified team ensures that all quality criteria are satisfied when the textile fabrics are made. The Total Quality

Management approach is used to assure quality checks throughout the process.
